

What is it called when a horse runs really fast?

- A) jumping
- B) trotting
- C) galloping
- D) running

The correct answer is C, galloping. Horses have 4 gaits: walk, trot, canter, and gallop. Galloping is the fastest a horse can move.

In what unit do you measure a horse?

- A) hands
- B) inches
- C) feet
- D) seconds

The correct answer is A, hands. 1 hand is equal to 4 inches.

True or false: a pony is another term for a baby horse.

- A) true
- B) false

The correct answer is B, false.

A pony is a term for a horse under 14.2 hands, NOT a baby horse.

Which of the following terms refer to the equipment used to ride a horse?

- A) saddle
- B) reins
- C) bit
- D) all of the above

The correct answer is D, all of the above.

The saddle, reins, and bit are all used to ride a horse.

True or false: the reins are used to help steer the horse?

- A) true
- B) false

The correct answer is A, true.

Riders use their reins to tell the horse what direction they want to go.
